

Kenet Expands Worldwide Sales Network

Kenet Signs Representatives across North America, Europe, Middle East and Asia

WOBURN, MA, December 3, 2007 – Kenet Inc., a developer of revolutionary, low-power, analog mixed-signal products, announced today that it has signed agreements with world-class electronic sales representative firms and product distributors that provide broad sales and marketing coverage across the Americas, Europe, Middle East and Asia. Kenet is now positioned to offer global sales on a local level.

Firms recently signed by Kenet include:

North America: Addem in Scottsdale, AZ covering Arizona and New Mexico; Advanced Technology Marketing in Chelmsford, MA covering New England; Centaur North for northern California; Lange Sales, Littleton, CO for the Rockies; L-Mar Associates in Pittsford, NY for upstate New York; Lyons Corporation in Dayton, OH covering Ohio and western Pennsylvania and Procyon Technical Sales in Irvine, CA covering southern California.

Asia: Acetronix in Seoul, Korea; Lestina in Shenzhen, China for all of China and Hong Kong and Sunamper in Taipei, Taiwan.

Europe/Middle East: Condatas AG in Switzerland; Eldis Technologies Ltd. in Israel; Elexo in France; GLOBES Elektronik GmbH & Co KG, in Germany; Link Microtek Ltd. in the United Kingdom; Repretech Nordic OY in Scandinavia, Baltic States and Russia; RF Wave S.r.l. in Italy and Top-Electronics covering the Benelux region.

These respected firms are actively engaged with key customers who are designing Kenet's ultra-low-power, high-speed ADCs into their products. Kenet's *FemtoCharge*[®] CMOS-based ADCs deliver an unprecedented combination of high performance and low power consumption, providing customers a distinct competitive advantage in their markets.

"Enthusiastic interest in Kenet's industry-leading data conversion products from customers world-wide is now served with a best-in-class sales representative and distribution network. We are excited to have these top sales organizations join our existing sales team to ensure the best possible local support to our customers, globally." said Phillip LoPresti, CEO and president of Kenet. "Customer demand for Kenet's high-performance, low-power ADCs reaffirms the compelling value that our products offer designers. We will continue to expand sales and application support, ensuring our customer's success."

About Kenet

Kenet Inc. is a fabless semiconductor company founded to bring to market low-power mixed-signal technology developed at MIT. The company is developing innovative enabling solutions for industrial instrumentation, wireless communications, networking, portable consumer products and military and government applications. Kenet is backed by investors including Venrock Associates, Oak Investment Partners, Kopin Corporation, and CP Group. For more information, please contact Kenet at 781-497-0060 or info@kenetinc.com.
